

pastiglieperamore.com at Joker – 217 Days in violation

A screenshot of a web browser window showing the website <http://pastiglieperamore.com/ordine-cialis-ord>. The browser's address bar, menu bar (File, Edit, View, Favorites, Tools, Help), and a Favorites bar are visible. The website content includes a green header with the text "Pastiglie Per Amore", a grey section titled "Generic Cialis (Tadalafil)", a product image of a yellow pill, and a description: "Cialis migliora l'erezione e permette di avere rapporti sessuali sessuali." Below this, a table with columns "Pacchetto", "Prezzo", and "Per Pillole" is partially visible.

KnujOn Process Brief

The domains indicated below were reported to KnujOn.com as being advertised in unsolicited email messages or in connection with other illicit Internet activity. Inspection of some domains indicates they are used to advertise and sell illicit pharmaceuticals. These sites frequently offer drugs without prescription or age verification from unlicensed and unauthorized sources. Attempts to contact the registrant of record through the WHOIS failed for the reasons cited in each case. At the end of the 45-day WDPRS lifecycle the domains in question were still online with the same content and the WHOIS was not updated. In the interest of providing context and background, an example of the illicit content is provided. This particular complaint also involves a possible false suspension and/or false data reporting.

Case 1: pastiglieperamore.com

The domain is an illicit pharmacy advertised in unsolicited emails and malware, still online as of 30 November 2011. Rogue pharmacy domains owned by the same registrant are involved in mass malware infections at Rutgers University (see: ddanchev.blogspot.com/2011/03/compromised-universities-leads-to.html)

WDPRS Complaint Details

Domain	complaint date	45 Day Deadline	WDPRS #
pastiglieperamore.com	6/17/2011	8/1/11	3e1933e2634d3ea077694543de0e135a5441f1de

“Email not accepted for policy reasons.”

An attempt to contact the registrant of pastiglieperamore.com was made on 17 June 2011 at the WHOIS contact address “stavroscomodromos@yahoo.com” but our email was rejected for “policy reasons.” The “policy reason” in this case is that the domain itself (pastiglieperamore.com) is blacklisted for spamming. This is an ironic twist we encounter frequently. It makes it impossible to contact the registrant about the intended subject matter.

Original rejection text:

```
I'm afraid I wasn't able to deliver your message to the following addresses.
This is a permanent error; I've given up. Sorry it didn't work out.

<stavroscomodromos@yahoo.com>:
66.94.237.64 failed after I sent the message.
Remote host said: 554 Message not allowed - [PH01] Email not accepted for policy reasons.
```

Possible False Suspension

When we received the ICANN WDPRS Follow Up message for this complaint on 2 August 2011 the domain status in the update email was displayed as “**status: hold,invalid-address.**” However, the domain was still online. Our research shows the WHOIS for pastiglieperamore.com was changed on 5 June 2011 (before the complaint) and 5 August 2011 (after the cycle deadline). On both occasions the domain status read “**status: lock.**” There is no mention of hold status or invalid-address issues. In all, we have reviewed 10 different cached versions of the WHOIS record during the complaint cycle and cannot determine if the status was ever anything but “lock.” It is unclear at this time how a Registrar would be able to submit a different version of a WHOIS record to ICANN’s query, but this is clearly of great concern. The WHOIS update in the follow-up is 5 July 2011, but we could not confirm this. This indicates the other possibility that the status was temporarily changed while ICANN queried the record for follow-up processing and then the domain was immediately reinstated.
